FoodReal Not To Be Fixed

For the enhancement problems that cannot or will not be implemented, add the problems along with the reasons for not fixing them

- "Have you eaten yet " reminder feature
  - Description: Users can "poke" each other to ask if they've eaten yet
  - Reason: We need to pay for premium account to use push notification with firestore, it would also be very time consuming
- App publishing
  - Description: We will not be posting our app on the app store
  - Reason: We need to pay for premium apple developer's account to send the app for review and publish it onto the app store
